

Esophagogastroduodenoscopy (EGD) – CPT® Codes 43235-43270

Esophagogastroduodenoscopy (EGD) is a procedure that involves the use of an endoscope to examine the upper gastrointestinal tract. The procedure is performed by a gastroenterologist and is used to diagnose and treat a variety of conditions, including gastroesophageal reflux disease (GERD), peptic ulcer disease, and celiac disease. The procedure is typically performed on an outpatient basis and is covered by most health insurance plans.
